MOSH / MOAH

Dear customer,

Thank you for your inquiry and your interest in our lubricants. With this letter we would like to inform you that our product **BOGE FoodLub H1SX** is formulated with high-purity components and does not contain mineral oil above 0.1% in accordance with its specification. This ensures that the product meets the most stringent quality and safety expectations in line with current regulatory guidance.

These products are based on fully synthetic base oils. The products supplied by BOGE have been specially developed for the food industry and have an NSF-H1 registration, which requires the use of only Food and Drug Administration (FDA / USA) approved raw materials (base oils and additives). In addition, the products are ISO 21469, Kosher and Halal certified. Thus, they offer the greatest possible food safety for the end consumer and can therefore be stated as safe regarding MOSH & MOAH content.

For any impurity not in the context of the formulation we are not contractually liable.

If we can be of further assistance, please do not hesitate to contact us again.

Best regards,

BOGE KOMPRESSOREN Otto Boge GmbH & Co. KG
